The Future of Appraisal & Property Tax

# Public Access

Provide Easy Access to Records, Property, and Tax Information on Your Website

## EASY ACCESS TO INFORMATION

Aumentum Public Access is an easy-to-use and cost-effective solution that is ready to support your government offices in serving their public. Our application provides 24/7 services, so your citizens and businesses always feel connected to your office. Offer a higher level of customer service for your constituents by providing convenient access to information and services on your website.

# Public Access Highlights

Aumentum Public Access provides your jurisdiction with a comprehensive and customizable website that allows your constituents to do more than just view and pay property taxes online. Taxpayers will have the flexibility to view and download reports, upload information to your office, and file important forms on time without an in-person visit. Public Access easily integrates with Aumentum Tax, Aumentum Valuation, and ProVal.

## Reduce Office Traffic

Serve the public online with access to records, CAMA information, personal property, and tax data quickly and easily. With current data available on your site, the public can use self-service options and reduce your staff's workload.

## Website Integration and Configuration Management

Empower your team with real-time control over your website content with built-in, self-serve tools. Our platform features granular security role configurations, ensuring that only authorized users can access and edit specific areas of the site.

## Site Analytics

Calculates tax revenue due. Analyze site traffic and trends using reports so you can better serve your constituents.

## Website Configuration

Your site content is highly configurable allowing you to control exactly how your content is displayed.

## Streamlined eForm/eFile Functionality

This robust functionality empowers Counties to enhance efficiency while providing constituents with a modern, user-friendly digital service. Forms can be customized with features such as pre-filled account data, date entry format validation, dropdown menus for guided responses, and the option to upload supporting documents. Once completed, users can download or email a copy for their records. Submissions can be delivered directly to Aumentum via email or integrated into Aumentum Workflow.

## Data Security

Aumentum Technologies hosts your website at a Tier 1 facility to ensure your real-time data stays secure.
