Aumentum Valuation *Highlights*

Aumentum Valuation provides crucial point-in-time appraisal capabilities with effective versioned data, sales tracking, and user-configurable property characteristics. Our powerful valuation engine supports all approaches to value including: cost, market and income, ensuring a seamless and accurate reassessment.

Modular Valuation Engines

All of our valuation engines are self-contained in order to support inclusion of jurisdiction-specific configuration, while at the same time insulating you from outside jurisdiction configuration and eliminating unintended breakages over time.

Integrated Sketch Tool

Includes a fully integrated, industry-leading sketch tool with the ability to sketch all improvements. This tool automatically calculates the square footage of each component, updates the database, and is capable of handling multiple structures per record.

Custom Forms & Correspondence

In a user-friendly Microsoft application environment, users create letters and forms using Aumentum correspondence tools.

Third-Party Integrations

Valuable third-party integrations extend Aumentum Valuation's capabilities. We integrate with leading partners such as Eagleview (Pictometry) for oblique imagery and Microsoft Power BI for analytics, as well as your chosen partner for mobile field data collection.

AI-Powered Data Automation & Valuation

Transform change of ownership and tax relief program workflows by leveraging machine learning to intelligently extract data. Save time and minimize errors with data processing and analysis, seamlessly integrated with existing property tax information within Aumentum.

Case Management

An optional Aumentum module, Case Management provides jurisdictions or their jurisdictional value review boards, the ability to customize and manage their Appeals process from start to finish.

Benefits of *Integration*

Aumentum Valuation is part of our modular, fully integrated CAMA, Assessment, and Tax solution, Aumentum Platform. Aumentum Platform brings new feature functionality and many opportunities for Counties to gain efficiencies around workflow and integration. Aumentum Platform includes Aumentum Tax, our comprehensive and flexible tax billing, collection, and management solution, as well as Aumentum Public Access.

Harness the power of an integrated solution by selecting all of these best-of-breed modules, allowing for one system of record, enhanced system workflows, customer service improvements, and the ability to streamline how your constituents interact with the County.

Aumentum Platform Functionality

A Seamlessly Integrated System

Aumentum Valuation

Our fully integrated CAMA and Assessment system is designed for high-volume transactions containing real, personal, or centrally assessed property data and integrates application processing and automated calculations for exemptions, benefits, reductions, and deferrals.

Aumentum Tax

Aumentum Tax is a comprehensive and flexible tax billing, collection, and management solution to accurately and fairly apply property taxes. Aumentum Tax gives you a complete range of property tax software tools, including levy management, billing, collection, cashiering, and special assessments.

Aumentum Public Access

Provide your jurisdiction with a comprehensive and customizable website that allows your constituents to view and pay property taxes online, as well as file important forms.

A Legacy of Local Expertise for Over 50 Years

Aumentum Technologies provides industry-leading CAMA and Property Tax solutions for local government. For over 50 years our experienced team of experts has focused on developing and delivering state-of-the-art software for our valued government customers. Our Valuation and Property Tax solutions have powered hundreds of jurisdictions in states across the country, including: California, Florida, Georgia, Minnesota, Oregon, South Carolina, Virginia, Washington and many more.
